Assessment Requirements for UEPMNT412 Modify complex electrical equipment

Release: 2

Assessment Requirements for UEPMNT412 Modify complex electrical equipment

Modification History

Release 2. Minor release to update superseded pre-requisite units.

Release 1. This is the first release of this unit of competency in the UEP Generation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and includes:

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including:
 - emergency procedures
 - hazard identification
 - risk control measures
 - safe working practices
- carrying out modifications
- communicating with personnel
- completing work as per scheduled requirements
- determining permit to work requirements
- employing test and measurement instruments
- implementing legislations, industry standards, codes of practice and regulations
- modifying complex electrical equipment using modification techniques using manufacturers' specifications, manuals and circuit plans
- planning for modification of complex electrical equipment work
- selecting materials
- utilising data analysis techniques and tools
- working with tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- complex electrical equipment and its operation
- equipment and materials

- generation plant and equipment, its location and operation
- isolations
- legislation, industry standards, codes of practice and regulations
- manufacturers' specifications, circuit plans and manuals
- modifications of complex electrical equipment using modification techniques
- permit to work system
- test and measurement instruments
- typical arrangements of power production plant
- WHS/OHS legislated requirements including:
 - emergency procedures
 - hazard identification
 - risk control measures
 - safe working practices
- workplace documentation
- workplace policies and procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
