UEPOPS096 Operate and monitor fuel supply

Release: 1

UEPOPS096 Operate and monitor fuel supply

Modification History

Release 1. This is the first release of this unit of competency in the UEP Electricity Supply Industry – Generation Sector Training Package Release 2.0.

Application

This unit involves the skills and knowledge required to operate, inspect and monitor fuel supply from source to recipient unit storage.

A fuel system will consist of a variety of plant and equipment that requires regular monitoring to ensure smooth operations are maintained in the fuel delivery process.

Competency in this unit requires the ability to plan work, operate fuel supply plant, test fuel supply plant, analyse fuel supply plant faults, monitor and inspect fuel supply plant, and complete all documentation. Individuals will, in general, work under supervision, in a power generation facility, as a fuel operator.

Power generation plant operators are trained and authorised to isolate, prepare plant and issue permits to work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

There are no prerequisite units

Competency Field

Operations

Unit Sector

Electricity generation

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Plan and prepare work | <ul style="list-style-type: none">1.1 Work health and safety (WHS)/occupational health and safety (OHS) regulations, legislative requirements, codes of practice, manufacturers' recommendations and specifications, environmental requirements and workplace procedures are identified, applied and monitored1.2 Work requirements are identified from relevant personnel and documentation in accordance with workplace procedures1.3 Documentation to determine fuel supply plant status is assessed and evaluated in accordance with workplace procedures1.4 Inspection and field preparation for fuel supply plant service are carried out in accordance with manufacturers' recommendations and specifications, and workplace procedures1.5 Fuel supply plant operational prerequisites are established in accordance with manufacturers' recommendations and specifications, and workplace procedures1.6 Sequence for recommissioning of fuel supply plant is determined to suit existing circumstances in accordance with workplace procedures |
| 2 Operate fuel supply plant | <ul style="list-style-type: none">2.1 Fuel supply plant is operated in accordance with manufacturers' recommendations and specifications, and workplace procedures2.2 Fuel supply plant is monitored to detect deviations from normal operating conditions in accordance with workplace procedures2.3 Corrective actions are taken to rectify fuel supply plant abnormalities in accordance with manufacturers' recommendations and specifications, and workplace procedures |
| 3 Test fuel supply plant operation | <ul style="list-style-type: none">3.1 Operational tests are performed in accordance with workplace procedures3.2 Fuel supply plant is observed for operational response in accordance with workplace procedures3.3 Fuel supply plant is returned to required operational |

		status upon completion of test in accordance with workplace procedures
4 Analyse fuel supply plant faults	4.1	Causes of abnormal fuel supply plant operating conditions are identified by analysing technical and operational information in accordance with workplace procedures
	4.2	Fuel supply plant integrity and personnel safety are maintained in consultation with relevant personnel and technical and operational documentation in accordance with workplace procedures
5 Monitor and inspect fuel supply plant	5.1	Fuel supply plant is monitored and inspected for normal operation and to detect deviations in accordance with workplace procedures
	5.2	Relevant personnel are notified when defects are detected in accordance with workplace procedures
6 Complete documentation	6.1	Fuel supply plant problems, movements, abnormalities and status are reported in accordance with workplace procedures
	6.2	Documentation is updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UEP Electricity Supply Industry – Generation Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UEPOPS312 Operate and monitor fuel supply.
