# Assessment Requirements for UEPOPS331 Operate and monitor water systems (condensate and feedwater)

Release: 1

## Assessment Requirements for UEPOPS331 Operate and monitor water systems (condensate and feedwater)

#### **Modification History**

Release 1. This is the first release of this unit of competency in the UEP Generation Training Package.

### **Performance Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and includes:

- analysing water system plant faults using data analysis techniques and tools
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including:
  - emergency procedures
  - risk control measures
  - safe work practices
- communicating with personnel
- completing documentation using recording procedures
- identifying water system plant status
- monitoring and inspecting water system plant operations
- operating water system
- organising resources
- performing isolations
- preparing and planning work
- recognising and responding to abnormal water system plant operating conditions
- testing water system (condensate and feedwater) plant operationally using diagnostic and test techniques
- using permit to work system
- working with water system plant and equipment

## **Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of:

- · characteristic water system plant faults and corrective actions
- · feedwater system plant types and characteristics including feedwater chemical treatments
- isolations

Assessment Requirements for UEPOPS331 Operate and monitor water systems (condensate and feedwater)Date this document was generated: 21 April 2021

- legislation, industry standards, codes of practice and regulations
- manufacturers' specifications and manuals
- permit to work system
- typical arrangements of power production plant
- water system plant and equipment, its location and operating parameters
- water system plant status
- WHS/OHS legislated requirements including:
  - emergency procedures
  - risk control measures
  - safe work practices
- workplace documentation
- workplace policies and procedures

#### **Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
