# **Assessment Requirements for UETDRIS032 Solve problems in network equipment**

**Release: 1**

# Assessment Requirements for UETDRIS032 Solve problems in network equipment

## Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two (2) separate occasions and include:

- applying relevant legislation, regulations, standards, codes of practice and organisational workplace requirements including:
  - work health and safety (WHS)/occupational health and safety (OHS) requirements
- identifying hazards, assessing risks, and identifying, applying and monitoring control measures
- obtaining, inspecting and using relevant personal protective equipment (PPE)
- dealing with an unplanned event on at least one (1) occasion
- obtaining and signing work permits in accordance with workplace requirements
- completing relevant work records, reports and documentation
- solving problems in network equipment, including:
  - determining equipment operating parameters
  - determining scope of work and resource requirements
  - applying problem-solving techniques
  - applying manufacturer's settings to meet network requirements
  - conducting functional testing
- solving problems in network equipment on at least one (1) of the following network systems:
  - distribution overhead
  - distribution underground
  - transmission overhead
  - transmission underground
- using at least three (3) of the following distribution/transmission equipment types:
  - voltage regulation equipment
  - on-load tap changers (OLTCs)
  - energy metering
  - demand meters
  - load control
  - current transformers

- potential transformers.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant legislation, regulations, standards, codes of practice and organisational workplace requirements including WHS/OHS requirements
- hazard, risk assessment and risk control requirements, including potential hazards
- types and application of PPE
- safe use of plant, tools and equipment
- application, purpose and types of permits
- events constituting an unplanned event or incident
- procedures for responding to an unplanned event or incident
- workplace records, reports and documentation
- principles of all of the following:
  - generation
  - transmission
  - distribution
  - substations
  - overhead and underground systems,
  - inductance, capacitance and resistance
  - voltage regulation
  - transformers and OLTCs
  - line drop compensation
  - types of system faults and protection
  - voltage surges
  - metering and metered quantities
  - load control.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace requirements, relevant industry standards, equipment specifications, regulations, codes of practice and operation manuals.
