ACMSPE308 Provide basic care of marine invertebrates

Release: 1

ACMSPE308 Provide basic care of marine invertebrates

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to identify marine invertebrates and their behavioural and physical needs, and provide daily care requirements.

This unit applies to individuals working in the animal care industry where it may be necessary to care for marine invertebrates. This may include aquariums, pet stores, zoos, animal technology facilities or similar workplaces. The unit applies to individuals who work under broad supervision and provide and communicate solutions to a range of predictable problems.

Regulatory requirements apply to this unit but vary according to state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

Nil

Unit Sector

Species Specific (SPE)

Elements and Performance Criteria

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify marine invertebrates	1.1 Define the profile of marine invertebrates commonly held in facility, including habitat, nutrition, health and behavioural characteristics

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Identify external features using industry terminology 1.3 Classify marine invertebrates using industry terminology 1.4 Define, interpret and document colours, markings and other identifying features
2. Identify and evaluate behavioural and housing needs	2.1 Monitor water quality and make adjustments as required to maintain optimum water quality appropriate for the species being housed, as directed by supervisor 2.2 Identify indicators of animal comfort and normal behaviour, and recognise signs of distressed marine invertebrates and report to supervisor 2.3 Identify industry standards and guidelines for housing design, environmental factors and appropriate stocking densities 2.4 Evaluate current animal housing design in relation to the welfare of animals kept and legislation requirements 2.5 Implement behavioural enrichment activities
3. Catch, handle and restrain marine invertebrates	3.1 Identify WHS hazards associated with handling and restraining marine invertebrates and implement methods to minimise risks 3.2 Approach, catch and restrain marine invertebrates in a way that minimises risks to animal and others using a range of approved animal welfare procedures
4. Assist with health care needs	4.1 Identify signs of good health in marine invertebrates 4.2 Report signs of disease or other conditions to supervisor 4.3 Identify general health maintenance and preventative treatment procedures and implement according to level of job responsibility 4.4 Identify options for health enrichment activities and implement as directed by supervisor
5. Feed marine invertebrates	5.1 Identify digestive system features and relate to species-specific feeding routines and diets 5.2 Identify preferred feed sources and assess samples for quality and suitability 5.3 Identify potential feeding hazards and implement risk control options 5.4 Prepare food in accordance with dietary needs

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.5 Distribute food according to schedule/feeding
6. Maintain records	6.1 Complete feed and treatment records noting food consumption, health and care activities 6.2 Report abnormalities to supervisor 6.3 Complete documentation relevant to licences and transport, where required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Interpret product labels accurately
Get the work done	- Comply with relevant legislation requirements relating to marine invertebrates - Use problem-solving skills to prioritise daily tasks

Unit Mapping Information
