Assessment Requirements for AHCAGB512 Plan and manage infrastructure

Release: 1

Assessment Requirements for AHCAGB512 Plan and manage infrastructure

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has planned and managed infrastructure requirements for at least one agricultural or horticultural production enterprise, including:

- identified infrastructure requirements for the enterprise
- planned and sourced requirements for at least one infrastructure improvement
- developed an infrastructure maintenance program including scheduling and responsibilities
- recognised potential opportunities to use or install more environmentally efficient systems or equipment
- established a recording system for infrastructure improvement, purchase, construction and maintenance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems for managing maintenance schedules and continuous improvement of infrastructure
- property planning, financial management and enterprise budgeting systems and procedures
- environmental controls and codes of practice relevant to the organisation
- management practices and processes to minimise noise odours and debris from production processes
- current legislation and regulations relating to infrastructure management and workplace health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer-based technology and software used to record information relevant to a primary production business
- specifications:
 - access to relevant regulations and guidelines for infrastructure management and workplace health and safety.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
