Assessment Requirements for AHCBER305 Carry out emergency disease or pest control procedures on infected premises

Release: 1

Assessment Requirements for AHCBER305 Carry out emergency disease or pest control procedures on infected premises

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least two occasions, carried out procedures for disease or pest control at an infected premises (IP) and has:

- prepared for control activities
- followed IP site supervisor instructions
- identified animal welfare concerns
- selected, prepared and used personal protective equipment (PPE)
- applied biosecurity principles and workplace health and safety practices when implementing, monitoring and reporting on control activities
- implemented control activities
- monitored, reviewed and reported on control activities for compliance and effectiveness
- undertaken remedial action according to authority
- reported variations to activities, failure to meet objectives and recommended adjustments to work instructions to IP site supervisor
- maintained log of emergency response activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control activities and procedures for emergency disease and pest control at IP
- objectives and work instructions commonly associated with IP operations
- responsibilities of roles within an IP control response
- ethical standards and animal welfare guidelines relevant to control procedures
- PPE and its requirement when working in IP operations
- principles of maintaining biosecurity at a workplace
- safe work practices applicable to work role

- reporting templates and requirements for logging control activities
- communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on an IP site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - specific tools and equipment for specific pest or disease control on IP
 - PPE
- specifications:
 - workplace policies, procedures and processes for pest or disease control
 - workplace instructions for emergency response on IP
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
