Assessment Requirements for AHCDES504 Design for construction of landscape features

Release: 1

Assessment Requirements for AHCDES504 Design for construction of landscape features

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate project costs
- develop a final design and project report
- draw plans to construction standards
- identify and document project timelines
- interpret detail architectural and landscape design drawings
- liaise with stakeholders, staff and contractors
- select appropriate materials and plants
- specify dimensions, footings and qualities of materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing for construction of landscape features
 - construction standards
 - drainage issues and the available resources to resolve problems
 - how to select appropriate plants and materials
 - materials available in the marketplace
 - plant specifications for a range of plants appropriate to the design
 - principles of surveying
 - site services, including electrical and water provision
 - stone walling, including gabions
 - the essentials of retaining walls
 - the paving process

Assessment Conditions

Assessors must satisfy current standards for RTOs.
