Assessment Requirements for AHCINF206 Install, maintain and repair farm fencing

Release: 1

Assessment Requirements for AHCINF206 Install, maintain and repair farm fencing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed, maintained and repaired farm fencing on at least one occasion and has:

- confirmed farm fencing requirements and plan with supervisor
- identified workplace health and safety hazards and risks, and reported to supervisor
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, prepared, transported and safely used fencing materials, tools and equipment applicable to installing, maintaining and repairing farm fencing
- conducted pre-operational checks and replaced or separated for repair tools and equipment identified with faults
- installed and repaired fencing components and gates
- dismantled and recovered reusable materials from existing fence
- reported farm fencing installation, maintenance and repair activities and unserviceable tools and equipment
- cleaned and tidied up work area and disposed of or recycled waste.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- designs and purpose of a range of farm fencing
- common hazards involved in fencing installation, maintenance and repair
- workplace requirements applicable to health and safety in the workplace for installing, maintaining and repairing farm fencing, including appropriate use of PPE
- tools and equipment used for fencing and their safe operation, storage and maintenance
- applications and limitations of wire types, knots and tensions

- fencing materials manufacturer specifications and guidelines.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fences, fencing tools, materials and equipment
 - PPE applicable to installing, maintaining and repairing farm fencing
- specifications:
 - workplace health and safety procedures relevant to farm fence installation, maintenance and repair
 - workplace documents, including processes, instructions, job and wire specifications relevant to installing, maintaining and repairing farm fencing
 - manufacturer operating instructions for fencing equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
