| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0. |

## Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and constructed conventional fencing on at least one occasion and has:

- sited fence line according to property or land management plan
- sourced and arranged delivery of fencing materials
- recognised and reported workplace health and safety hazards and used safe work practices
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- constructed a fence that meets specifications in the fencing plan and is within tolerances for materials
- strung and strained wires to manufacturer recommended tension
- used and maintained fencing tools and equipment
- constructed gate assemblies and swing gate
- cleaned and tidied up work area, stored tools and equipment and disposed of waste.

## Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- range of fencing designs, construction methods and materials
- fencing materials and costings
- procedures for planning fencing in relation to the whole property plan
- issues affecting property fence planning and construction
- types of fencing construction tools and equipment
- common fencing hazards and safety precautions
- workplace requirements applicable to health and safety in the workplace for planning and constructing conventional fencing, including appropriate use of PPE

- disposal and recycling of waste material, including identification and disposal of hazardous material associated with conventional fence planning and construction
- workplace procedures relevant to conventional fence planning and construction, and disposing of waste materials.

## Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - fences, fencing tools, material and equipment
  - PPE applicable to conventional fence planning and construction
- specifications:
  - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to conventional fence planning and construction
  - workplace documents, including workplace procedures, processes, instructions and job specifications relevant to conventional fence planning and construction.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
