Assessment Requirements for AHCLPW312 Carry out inspection of designated area

Release: 1

Assessment Requirements for AHCLPW312 Carry out inspection of designated area

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted at least one inspection for a designated area for a specified purpose, including:

- defined the scope, criteria and target on which to base inspection
- defined the hazards and risks to work health and safety and the environment associated with inspection
- conducted inspections, complying with statutory requirements and workplace protocols for entry to private property
- conducted inspections in a manner that minimises environmental impacts
- operated equipment and vehicles during the inspection according to workplace procedures
- established environmental impacts caused by target
- produced a report that:
 - documents the inspection findings and results
 - analyses the outcomes of inspection
 - provides recommendations and follow-up actions
- complied with workplace health and safety practices while conducting the inspection
- implemented controls to minimise environmental risks during inspection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- risk management processes, including:
 - identifying hazards
 - analysing and ranking risk
 - identifying and implementing controls
 - monitoring risk

- types and characteristics of inspection targets
- procedures and techniques for planning and conducting inspections, including:
 - defining the inspection scope and purpose
 - working with stakeholders
 - gathering and collating information and data
- monitoring of designated areas and techniques used
- basic reporting procedures, including:
 - analysing information and data
 - presenting the analysis in a written form
 - decision making and defining recommendations
 - basic report writing skills
- legislative and regulatory requirements, including environmental protection legislation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated for an actual inspection on a defined area
- resources, equipment and materials:
 - specific tools and equipment required for the inspection and specified target
 - computer or similar device for collating, analysing and documenting inspection results
- specifications:
 - workplace policies, procedures and processes for conducting inspections
 - workplace instructions and specifications for purpose and scope of inspection
 - legislation and regulations governing access to private premises
- relationships:
 - stakeholder/s.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
