Assessment Requirements for AHCLSK221 Assist with feeding in a production system

Release: 1

Assessment Requirements for AHCLSK221 Assist with feeding in a production system

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 11.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted with feeding livestock in a production system on at least two occasions, and has:

- followed relevant workplace health and safety and environment and biosecurity legislation, regulations and workplace procedures
- identified a range of feed types and qualities
- identified feed contaminants
- prepared and distributed feed
- checked watering systems
- recognised and rectified minor operational faults
- completed records and documentation of feed use and volumes
- used machinery and equipment associated with providing feed
- recorded and reported livestock feeding and unserviceable tools, machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for feeding livestock in a production system, including appropriate use of personal protective equipment (PPE)
- environment and biosecurity legislation and regulations and workplace practices relevant to feeding livestock in a production system
- principles and practices for feeding livestock in a production system, including:
 - basic silo operations, tractors and associated feeding machinery and equipment
 - cleaning and storage of machinery, equipment and materials

- workplace recording and reporting procedures
- common grains, meals, pelleted feeds and liquid feeds
- evidence of spoilage and handling of spoilt feeds.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to feeding livestock in a production system
 - facilities, materials and equipment applicable to feeding livestock in a production system
 - PPE applicable to feeding livestock in a production system
- specifications:
 - workplace requirements applicable to health and safety in the workplace for feeding livestock in a production system
 - environment and biosecurity legislation and regulations and workplace practices applicable to feeding livestock in a production system
 - legislation, regulations, standards, guidelines and procedures for animal welfare applicable to feeding livestock in a production system
- relationships:
 - supervisor
- time frames:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
