Assessment Requirements for AHCLSK348

Coordinate and monitor production performance

Release: 1

Assessment Requirements for AHCLSK348 Coordinate and monitor production performance

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 11.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has coordinated and monitored production performance on at least one occasion, and has:

- applied relevant workplace health and safety and environment and biosecurity legislation, regulations and workplace procedures
- applied relevant animal welfare practices
- recognised and reported workplace health and safety hazards and used safe work practices
- read and interpreted cost sheets, production information, target statistics, quantities of feed and other inputs relevant to production performance
- monitored shed temperature and adjusted as required
- read and interpreted production spreadsheet information using a software package and presented to management and operators
- discussed production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpreted the activities contained in livestock production plan and work program
- recognised when performance standards are not met and investigated and reported findings in written form
- provided supervision of staff, including allocating duties and providing feedback on performance.

Knowledge Evidence

An individual must be able to demonstrate knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for coordinating and monitoring production performance

- environment and biosecurity legislation and regulations, workplace practices and quality standards relevant to coordinating and monitoring production performance
- principles and practices for coordinating and monitoring production performance, including:
 - common livestock diseases and clinical signs
 - animal welfare practices
 - types of sheds and equipment
 - raw data to determine issues and problems
 - recording and reporting requirements
 - fundamentals of livestock biosecurity control methods
 - common feed ingredients and additives
 - water reticulation systems and quality.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to coordinating and monitoring production performance
 - equipment and resources applicable to coordinating and monitoring production performance
- specifications:
 - workplace requirements applicable to health and safety in the workplace for coordinating and monitoring production performance
 - environment and biosecurity legislation and regulations and workplace practices applicable to coordinating and monitoring production performance
 - legislation, regulations, standards, guidelines and procedures for animal welfare applicable to coordinating and monitoring production performance
- relationships:
 - management, supervisor, staff and contractors
- time frames:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
