Assessment Requirements for AHCLSK352 Implement feeding plans for intensive livestock production

Release: 1

Assessment Requirements for AHCLSK352 Implement feeding plans for intensive livestock production

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 11.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented feeding plans for intensive livestock production on at least one occasion, and has:

- applied relevant workplace health and safety and environment and biosecurity legislation, regulations and workplace procedures
- applied relevant animal welfare practices
- recognised and reported workplace health and safety hazards and used safe work practices
- assessed livestock according to workplace requirements
- prepared for feeding livestock
- handled livestock using good stock handling techniques
- carried out feeding and watering
- cleaned feeding equipment
- completed records and documentation
- reported work activities.

Knowledge Evidence

An individual must be able to demonstrate knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for implementing feeding plans for intensive livestock production
- environment and biosecurity legislation and regulations and workplace practices relevant to implementing feeding plans for intensive livestock production
- principles and practices for implementing feeding plans for intensive livestock production, including:
 - environmental impacts of intensive livestock feeding
 - methods of assessing livestock condition

- systems and stages of intensive livestock production
- feed distribution systems and feeders, their functions, maintenance and servicing
- methods of storage and handling of intensive livestock feed and impact of feed quality changes on livestock
- intensive livestock feeding programs and impact of program changes or variations on livestock
- watering systems and equipment, their functions, maintenance, servicing and impact of changes or variations on livestock
- methods of cleaning feed equipment, cleaning agents, and their proper use and disposal
- types of information to be gathered, and documentation and records that must be maintained
- good stock handling techniques
- animal welfare practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to implementing feeding plans for intensive livestock production
 - equipment and materials applicable to implementing feeding plans for intensive livestock production
 - livestock
- specifications:
 - workplace requirements applicable to health and safety in the workplace for implementing feeding plans for intensive livestock production
 - environment and biosecurity legislation and regulations and workplace practices applicable to implementing feeding plans for intensive livestock production
 - legislation, regulations, standards, guidelines and procedures for animal welfare applicable to implementing feeding plans for intensive livestock production
- time frames:
 - according to job requirements.

Assessment of this unit must be conducted on live animals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
