Assessment Requirements for AHCLSK354 Monitor livestock production growing environments

Release: 1

Assessment Requirements for AHCLSK354 Monitor livestock production growing environments

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 11.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored livestock production growing environments on at least two occasions, and has:

- applied relevant workplace health and safety and environment and biosecurity legislation, regulations and workplace procedures
- applied relevant animal welfare practices
- recognised and reported workplace health and safety hazards and used safe work practices
- monitored livestock health and welfare
- monitored the production growing environment
- monitored feed systems and water supplies
- performed routine maintenance checks
- completed monitoring activities
- reported significant production problems
- recorded work activities and checks.

Knowledge Evidence

An individual must be able to demonstrate knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for monitoring livestock production growing environments
- environment and biosecurity legislation and regulations, workplace practices and quality standards relevant to monitoring livestock production growing environments
- principles and practices for monitoring livestock production growing environments, including:
 - livestock production parameters and production assessment systems
 - signs of health and methods of assessing livestock health

- animal welfare practices and requirements
- livestock housing, production and management systems and equipment
- livestock hygiene and biosecurity requirements
- workplace waste disposal requirements
- livestock production management and feeding programs
- monitoring housing and production structures, environmental control equipment, watering and feed delivery equipment
- recording and reporting requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to monitoring livestock production growing environments
 - equipment and resources applicable to monitoring livestock production growing environments
- specifications:
 - workplace requirements applicable to health and safety in the workplace for monitoring livestock production growing environments
 - environment and biosecurity legislation and regulations and workplace practices applicable to monitoring livestock production growing environments
 - legislation, regulations, standards, guidelines and procedures for animal welfare applicable to monitoring livestock production growing environments
- relationships:
 - supervisor
- time frames:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
