Assessment Requirements for AHCLSK365 Mix and mill standard stockfeed

Release: 1

Assessment Requirements for AHCLSK365 Mix and mill standard stockfeed

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 11.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has mixed and milled standard stockfeed for intensive production on at least two occasions, and has:

- applied relevant workplace health and safety and environment and biosecurity legislation, regulations and workplace procedures
- recognised and reported workplace health and safety hazards and used safe work practices
- followed workplace mill and mix stockfeed work program
- ordered and stored feed and ingredients
- identified feed ingredients and obtained from storage locations
- measured ingredients in the specified ratios and quantities
- mixed and milled feeds and ingredients according to workplace and industry quality standards and requirements
- recognised and rectified minor operational faults and performed routine maintenance
- completed records and documentation of feed use and volumes
- conducted post-procedural hygiene and administration activities.

Knowledge Evidence

An individual must be able to demonstrate knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for mixing and milling standard stockfeed, including appropriate use of personal protective equipment (PPE)
- environment and biosecurity legislation and regulations and workplace practices relevant to mixing and milling standard stockfeed
- principles and practices for mixing and milling standard stockfeed, including:
 - workplace requirements for mixing and milling feeds

- tools, equipment and machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds, and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients
- the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
- measurement equipment for feed ingredients, and their calibration and maintenance
- procedures for mixing, blending and milling feed ingredients and feeds, including tempering, boiling and rolling seeds, grains and feed
- documentation and record keeping requirements for mixing and milling feed.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions and workplace procedures applicable to mixing and milling standard stockfeed
 - tools, equipment and materials applicable to mixing and milling standard stockfeed
 - PPE applicable to mixing and milling standard stockfeed
- specifications:
 - workplace requirements applicable to health and safety in the workplace for mixing and milling standard stockfeed
 - environment and biosecurity legislation and regulations and workplace practices applicable to mixing and milling standard stockfeed
 - industry standards, legislation and codes of practice and procedures for mixing and milling standard stockfeed
- relationships:
 - supervisor
- time frames:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
