Assessment Requirements for AHCMD402 Monitor medicinal cannabis production for compliance and quality

Release: 1

Assessment Requirements for AHCMDC402 Monitor medicinal cannabis production for compliance and quality

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively monitored production processes of medicinal cannabis that apply in own area of responsibility, to ensure compliance with legislation, regulations and quality standards on at least one occasion, including:

- reviewed workplace procedures for compliance with legal and regulatory requirements and elements of Good Practices Standards
- conducted a risk and hazard identification audit and established critical control limits, measures and corrective actions
- instructed staff and contractors in quality procedures
- identified and managed record requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, regulations and standards relevant to the production of medicinal cannabis
- roles and functions of commonwealth government authorities responsible for administering the legislation and standards
- legislative and regulatory responsibilities required of licensed cultivators and manufacturers of medicinal cannabis, including recording and reporting requirements
- Good Practices Standards and organisation quality management systems relevant to the production of medicinal cannabis, including:
 - Good Agricultural and Collection Practices (GACP) in relation to cultivation and harvesting of plants, and quality and consistency of products
 - Good Manufacturing Practices (GMP) in relation to pre-processing and quality of products
- process for conducting risk and hazard identification and determining critical control limits, measures and corrective actions

- processes used to monitor regulatory compliance and quality practices in work operations and procedures
- purpose and process used for conducting and documenting a deviation investigation
- methods used for training staff and contractors on policies and procedures
- function and operations of organisation record system.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a medicinal cannabis production site or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace recording system
- specifications:
 - legislation and regulations related to the production of medicinal cannabis
 - workplace quality procedures
 - workplace procedures relating to the production of medicinal cannabis, including recording and reporting requirements
- relationships:
 - staff and/or contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
