Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down scraper operations used for earthworks in an agricultural environment.

The unit applies to individuals who conduct scraper operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for scraper operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret scraper operation and maintenance manual

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and observe manufacturer instructions 1.3 Assess the work site and confirm the suitability of the machinery for the task 1.4 Select and maintain personal protective equipment according to workplace safety requirements 1.5 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken 1.6 Conduct scraper routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair 1.7 Observe safety rules and regulations, including site rules and legislation and site specific instructions
2. Operate scraper	2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines 2.2 Drive and operate scraper, and modify the operating technique to meet changing work conditions 2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.4 Identify environmental and biosecurity implications associated with scraper operation and minimise impact 2.5 Complete work according to the agreed plan and within the operating capacity of the equipment and operator
3. Complete scraper operation	3.1 Park scraper and conduct shut down procedures 3.2 Perform routine operational servicing and minor maintenance according to scraper operation and maintenance manual 3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, secure and store scraper in line with workplace practices 3.5 Remove and store keys in the required location 3.6 Maintain scraper use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	Document scraper use
Oral communication	- Use clear language to report malfunctions, faults, irregular performance or damage - Participate in verbal exchanges to respond to questions and clarify information
Numeracy	- Calculate quantities of vehicle fluids including fuel - Identify correct tyre pressure or track tension
Navigate the world of work	Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	- maintenance interval schedule daily check - machine damage and serviceability - checking for missing parts - fluid leaks and levels - fuel level - brakes and clutch operation - condition of tyres or tracks - machine controls.
Biosecurity implications must include:	control of cross-site contamination.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down scraper operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for scraper operations
- carried out scraper pre-operational checks for safe scraper operations
- driven and operated a scraper safely including modifying operating technique to meet changing work conditions
- carried out scraper shut down procedures including securing and safe storage of scraper
- minimised environmental impacts associated with scraper operations
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the scraper
- followed industry and workplace biosecurity procedures
- completed required documentation for scraper use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with scraper operations
- scraper and site safety requirements
- scraper components, controls, features, technical capabilities and limitations
- scraper operation and maintenance manual
- duty of care to self, others and the environment
- relevant legislation with regard to scraper operation and licensing requirements
- environmental impacts relevant to the operation of scrapers

- workplace procedures applicable to work health and safety requirements to operate a scraper safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - scrapers
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - scraper operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to scraper operation
 - legislation relevant to scraper operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
