Assessment Requirements for AHCPHT411 Implement and monitor a horticultural crop harvesting program

Release: 1

Assessment Requirements for AHCPHT411 Implement and monitor a horticultural crop harvesting program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented and monitored a horticultural crop harvesting program on at least one occasion, and has:

- estimated crop quality and yield
- established strategies for pre-harvest and harvest
- implemented treatments for control and eradication of pests
- organised resources for the harvest
- coordinated equipment
- applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures
- documented a crop harvesting program and schedule of activities
- evaluated harvest operations and outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for crop harvesting, including:
 - crop measurement techniques and parameters
 - customer requirements
 - environmental controls and codes of practice applicable to harvesting operations
 - functions and limitations of harvesting equipment
 - location and relative skills and abilities of available staff, contractors or casual staff
 - market information and sources
 - required productivity rates
 - weather or other conditions that may affect harvest

- where relevant to workplace production: food safety and Hazard Analysis and Critical Control Points (HACCP) requirements, and requirements for export markets
- workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing and monitoring a horticultural crop harvesting program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the planning of a horticultural crop harvesting program
- specifications:
 - workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures relevant to implementing and monitoring a horticultural crop harvesting program
 - where relevant to workplace production food safety and HACCP requirements, and requirements for export markets
- relationships:
 - staff
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
