Assessment Requirements for AHCPMG506 Manage the implementation of legislation

Release: 2

Assessment Requirements for AHCPMG506 Manage the implementation of legislation

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, developed procedures to identify infestations in accordance with pest management legislation.

There must also be evidence that the individual has:

- interacted with landholders according to workplace requirements and legislative requirements to:
 - explain the ramifications of legislation
 - provide pest management advice
- explained policies for right of entry to work team
- prepared and served penalty notices to landholders who are in contravention of legislation
- collated evidence and findings for presentation in a court or to legal team
- prepared a ministerial brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant Commonwealth and state/territory legislation and regulations relevant to pest management, including:
 - identification, destruction, movement and propagation of declared species
 - gathering and presenting evidence
- appropriate record-keeping systems
- environmental protection legislation and compliance in land and water management
- land management and production principles

- techniques used in the development of policies and procedures
- how to present evidence for court proceedings
- principles that underpin a strategic approach to managing pests
- pest control treatments relating to pests dealt with under legislation
- monitoring points in the pest management plan and evidence of infestations
- biosecurity implications of pest management strategies
- chemicals and toxins used in pest control and environmental protection
- relevant local, regional, state/territory and national pest management strategies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an agency environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for reviewing legislation and preparing written documentation
- specifications:
 - workplace policies and procedures for preparing and processing pest management documents
 - legislation and regulations for pest management
- relationships:
 - landowners
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
