Assessment Requirements for AHCSP0312 Sample seed before and after processing

Release: 1

Assessment Requirements for AHCSPO312 Sample seed before and after processing

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sampled seed using industry and workplace sampling methods on at least one occasion for the following situations:

- graded and/or treated seed
- delivery truck on arrival at a processing plant/farm
- bulk containers and/or sacks

In doing so, there must be evidence that the individual has:

- completed sampling documentation including packaged and labelled seed samples and prepared samples for despatch
- recognised common weed seeds and other seed contaminants in sample
- recorded workplace information for seed samples
- selected sampling equipment for a representative sample according to workplace procedures and certification authority
- collected seed samples for testing by other agencies according to their specifications and procedures
- completed record and labels accurately according to specifications
- used tools for sampling and prepared a sample for despatch
- followed workplace health and safety standards, including fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of seed sampling, including:
 - purpose and correct methods of sampling
 - workplace records and other documentation

- seed handling and the importance of seed moisture content in seed samples
- recognised seed/grain types, including contaminating seed and biosecurity threats
- seed sampling protocols required by farm and/or agencies
- federal and state agencies overseeing seed movement in Australia and sampling standards, including:
 - federal and state quarantine and biosecurity regulators
 - Organisation for Economic Co-operation and Development (OECD)
 - Association of Official Seed Certifying Agencies (AOSCA)
 - other certification agencies
- workplace health and safety when sampling seed, including:
 - personal protective equipment used for sampling treated seed
 - working in confined spaces
 - safety barriers
 - working at heights.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a seed processing plant, a farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bulk unprocessed seed
 - bulk processed seed
 - seed sampling equipment
 - seed record keeping and labelling resources
 - personal protective equipment
- specifications:
 - seed sampling procedures and standards
 - manufacturer operating instructions for equipment
 - workplace instructions and specifications
- relationships:
 - supervisor(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
