Release 1

AHCSS00127 Milking Equipment Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set describes the skills and knowledge required to identify faults of milking equipment that do not require the services of qualified trades people, carry out routine adjustments and maintenance of equipment to rectify poor performance and ensure compliance with food safety standards and requirements.

Pathways Information

These units of competency provide credit towards the AHC30221 Certificate III in Dairy Production and a number of AHC Certificate IV qualifications.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB405 Analyse and interpret production data
- AHCDRY304 Carry out routine service of milking equipment
- AHCDRY305 Conduct mechanical tests on milking machines

Target Group

This skill set is for individuals who undertake routine servicing, maintenance and troubleshooting of milking equipment for the dairy production industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for undertaking routine servicing and maintenance of milking equipment.
