AHCSS00132 Growing Plants in a Permaculture System Skill Set

Release 1

AHCSS00132 Growing Plants in a Permaculture System Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Description

This skill set provides the skills and knowledge for the development of plant identification, species selection and propagation of plants commonly grown in permaculture systems.

Pathways Information

These units of competency can provide credit towards a range of qualifications and/or build on the skills and knowledge of previous qualifications attained from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPCM204 Recognise plants
- AHCPER331 Coordinate propagation activities for a permaculture system
- AHCPER335 Select plant and animal species for permaculture systems

Target Group

This skill set is for new entrants into the permaculture community who may support an existing permaculture system or who plan to develop skills in permaculture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for the recognition and selection of plants and their propagation in a permaculture environment.
