| Release 1 | This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0. |

### Description

This skill set provides the skills and knowledge required to harvest and process produce from a permaculture system and safely prepare it for storage according to industry and regulatory standards.

### Pathways Information

These units of competency can provide credit towards a range of qualifications and/or build on the skills and knowledge of previous qualifications attained from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

### Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to this skillset where handling, processing and distribution of permaculture products are used for human consumption. Users are advised to check with relevant regulatory authority.

### Skill Set Requirements

- AHCPER220 Harvest crops in a permaculture system
- AHCPER329 Coordinate preparation and storage of produce from a permaculture system
- 

### Target Group

This skill set is for individuals who support a permaculture system and are required to harvest, process and store produce from the system.

### Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for harvesting, preparing and safely storing produce from a permaculture system.
