AHCSS00139 Permaculture Water Systems Skill Set

Release 1

AHCSS00139 Permaculture Water Systems Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Description

This skill set provides the skills and knowledge required to develop water harvesting methods, prepare water storage and deliver water to site ready for use for domestic, farm or irrigation purposes in a permaculture system.

Pathways Information

These units of competency can provide credit towards a range of qualifications and/or build on the skills and knowledge of previous qualifications attained from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPER326 Install and maintain permaculture water management systems
- AHCPER334 Read and interpret property maps and plans
- AHCPER336 Test, improve and maintain healthy soil in a permaculture system

Target Group

This skill set is for property owners, permaculture systems developers and farmers who wish to implement sustainable water management procedures on rural or urban properties.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for installing and maintaining water management for permaculture systems.
