Assessment Requirements for AHCWRK322 Conduct site inspections

Release: 1

Assessment Requirements for AHCWRK322 Conduct site inspections

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a site inspection on at least one occasion and has:

- collected information relevant to conducting site inspection, including relevant regulations and legislation
- identified scope of inspection and sought approval to visit site where required
- prepared for and conducted site inspection
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- recorded site inspection information using inspection forms, and documented in an inspection or site inventory report
- recognised and reported workplace health and safety hazards and used safe work practices to minimise risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to source site maps and plans, including digital maps
- site map and plan interpretation
- site inspection procedures
- legislative and regulatory requirements, including environmental protection legislation relevant to conducting site inspections
- local government regulations relating to the proximity of trees to buildings, services and roads
- local tree protection and preservation regulations and codes of practice relevant to conducting site inspections
- protocols of accessing and visiting a site

- workplace requirements applicable to health and safety in the workplace for conducting site inspections, including appropriate use of PPE
- measuring and estimating methods
- current land use and environmental threats to site.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment applicable to conducting site inspections
 - PPE applicable to conducting site inspections
- specifications:
 - local government regulations and local tree protection and preservation regulations and codes of practice relevant to conducting a site inspection
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to conducting a site inspection
 - workplace documents, including workplace environmental procedures, processes, instructions and job specifications relevant to conducting a site inspection
- relationships:
 - client, stakeholder and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
