Assessment Requirements for AHCWRK519 Audit site operations

Release: 1

Assessment Requirements for AHCWRK519 Audit site operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has audited site operations on at least one occasion and has:

- determined the scope of items for audit
- identified client or organisation expectations
- interpreted and applied legislative, regulatory and industry requirements relevant to the audit of site operations
- specified parameters of audit requirements
- interpreted and applied codes of practice and Australian standards relevant to the audit of site operations
- defined the audit process
- organised scheduling and meetings
- planned for and acted on contingencies
- organised and completed audit
- identified compliance and non-compliance items
- evaluated audit findings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legal issues and terminology relating to quality auditing
- legislative, regulatory and industry requirements relevant to the audit of site operations
- quality principles and techniques
- codes of practice and Australian standards relevant to the audit of site operations
- logistics operations of organisation
- audit methodology and techniques relevant to the audit of site operations
- product or service relevant to site operations

- interview techniques
- workplace documentation and policies relevant to site operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace documentation and policies applicable to the audit of site operations
 - computer hardware and software
- specifications:
 - legislative, regulatory and industry requirements relevant to the audit of site operations
 - codes of practice and Australian standards relevant to the audit of site operations
- relationships:
 - clients, audited group and individual staff.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
