Assessment Requirements for AMPA2007

Identify animals using electronic systems

Release: 1

Assessment Requirements for AMPA2007 Identify animals using electronic systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must identify animals using electronic systems.

The candidate must:

- complete start-up procedures for electronic readers and recordings
- identify the steps in animal identification
- scan stock electronically in yards and pens (where applicable)
- operate the identification and recording system according to work instructions
- identify the sources of errors in identification and/or malfunction of the system
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, and regulatory requirements
- undertake routine maintenance, cleaning and monitoring according to workplace requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- the consequences of incorrect identification of animals
- the National Livestock Identification System (NLIS)
- the reasons for animal identification
- relevant workplace health and safety, and regulatory requirements
- animal identification requirements

Assessment Conditions

Competency must be demonstrated at normal rates of production.

As a minimum, the following three forms of assessment must be used:

- workplace demonstration
- quiz of underpinning knowledge

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
