AMPA2108 Loadout meat product

Release: 1

AMPA2108 Loadout meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to load meat products onto trucks and/or containers.

This unit is applicable to workers in a registered meat processing premises such as an abattoir, knackery, boning room, food service operations, smallgoods factory, wholesale butchery, wild game field depot or game meat processing establishment.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify product	1.1 Identify product required for order in accordance with workplace requirements and customer specifications 1.2 Correctly record temperature of product in accordance with workplace requirements

Element	Performance criteria
	1.3 Check brands or labels against order
2. Consolidate order	2.1 Check product order to ensure it is complete before loading 2.2 Assemble carcasses in hanging yard or palletise carton meat in accordance with workplace and health and safety requirements, where required
3. Loadout product	3.1 Handle order in accordance with hygiene and sanitation, and food safety requirements 3.2 Load product into transport vehicle, container or refrigerated storage in accordance with workplace requirements 3.3 Identify and meet workplace health and safety requirements 3.4 Meet security requirements for products in accordance with regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP2132C Loadout meat product

Assessment Requirements for AMPA2108 Loadout meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must load meat products onto trucks and/or containers.

The candidate must:

- ensure that all points leading to the loadout area are open and relevant points are closed when handling carcasses on the rail
- loadout product to workplace, health and safety and regulatory requirements and customer specifications.
- use loading machinery and technology according to workplace and manufacturer's specifications
- check brands and correctly label product when part of loadout procedures
- correctly identify products
- accurately record temperatures
- accurately weigh product where part of loadout procedures
- identify and comply with regulatory requirements for loadout including security arrangements for containers and trucks
- identify causes of cross contamination of carcasses during manual handling
- use communication skills relevant to work instructions

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace health and safety, regulatory, hygiene and sanitation requirements related to loadout of product
- purpose and nature of relevant documentation
- security requirements related to loadout
- impact of weather conditions at loadout from wild game depots e.g. rain (where applicable)

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant or game depot.

Competency must be demonstrated at the normal rate of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
