Assessment Requirements for AMPA2118 Recover thin skirts

Release: 1

Assessment Requirements for AMPA2118 Recover thin skirts

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must recover thin skirts as part of a slaughter floor operation.

The candidate must:

- remove thin skirts according to cutting line specifications, workplace, health and safety, Quality Assurance (QA), and hygiene and sanitation requirements
- identify and manage defects in thin skirts according to workplace requirements
- identify and correct sources of contamination and cross-contamination according to workplace requirements
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- cutting line specifications, workplace, health and safety and QA requirements related to the recovery of thin skirts
- possible defects in thin skirts
- possible sources of contamination and cross-contamination
- steps involved in recovering the thin skirt
- relevant regulatory requirements.

Assessment Conditions

Assessment must occur in an abattoir under normal production conditions.

Competency has to be demonstrated at normal chain speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.
