Assessment Requirements for AMPA2137 Chemically treat skins for fellmongering process

Release: 1

Assessment Requirements for AMPA2137 Chemically treat skins for fellmongering process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must apply chemicals to skins in a fellmongering process.

The candidate must:

- spray skins with chemicals in accordance with workplace health and safety requirements and workplace and customer specifications
- operate spraying equipment to workplace and workplace health and safety requirements
- cite and locate the safety data sheets for the chemicals used and explain how they relate to the use and disposal of the chemicals
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental risks and controls related to the use of chemicals
- protective equipment to be used for each chemical and relevant emergency procedures
- purpose of chemically treating skins in fellmongering
- relationship between concentration of chemicals and different types of skins
- relevant regulatory requirements.

Assessment Conditions

Assessment must be conducted in an operating fellmongering plant.

Competency must be demonstrated at normal production speed.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.
