Assessment Requirements for AMPA2157

Overview rendering process

Release: 1

Assessment Requirements for AMPA2157 Overview rendering process

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must explain the rendering process and work safely in the rendering area.

The candidate must:

- explain the sequence, risks and workplace requirements associated with the rendering process at their own plant
- apply relevant regulatory requirements
- meet the workplace health and safety requirements for working in the rendering area

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental hazards associated with rendering products and the appropriate workplace requirements to minimise these
- quality requirements for rendered products
- workplace and customer quality requirements for rendered products
- relevant regulatory requirements
- steps in rendering and the process involved
- workplace health and safety requirements for working in the rendering area

Assessment Conditions

Assessment must occur in the workplace under normal production conditions.

Competency must be demonstrated in a rendering plant at a rate that meets workplace requirements.

As a minimum, three different forms of assessment must be used.

Assessors must satisfy the current standards for RTOs.
