Assessment Requirements for AMPA2161

Operate waste recovery systems

Release: 1

Assessment Requirements for AMPA2161 Operate waste recovery systems

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must recover material from waste water so that solids are not pumped into waste water systems.

The candidate must:

- operate waste recovery systems in accordance with workplace requirements
- consistently observe workplace health and safety requirements
- operate mechanised system so that solids are not pumped into the waste system

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- environmental and workplace requirements related to the operation of waste recovery systems.

Assessment Conditions

Assessment must involve demonstrated competency monitoring a functioning waste recovery system.

Competency must be demonstrated in an operating facility.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
