Assessment Requirements for AMPA2170 Operate air filtration system

Release: 1

Assessment Requirements for AMPA2170 Operate air filtration system

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must operate, monitor and routinely maintain air filtration systems used at meat processing plants to reduce noxious odour emissions.

The candidate must:

- operate and maintain the air filtration system in accordance with workplace requirements and manufacturer's specifications
- observe relevant workplace health and safety requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- steps involved in the operation of an air filtration system
- work instructions
- environmental issues associated with air filtration
- legal implications of defective air filtration
- relevant workplace health and safety requirements

Assessment Conditions

Assessment must be conducted utilising an operating air filtration system.

Competency needs to be demonstrated under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
