AMPA3041 Eviscerate wild game animal carcase

Release: 1

AMPA3041 Eviscerate wild game animal carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to eviscerate a carcase that has been wild game shot and forwarded to a meatworks for processing. Such carcasses may be required to have the pluck left in to enable meat inspection procedures to take place at wild game processing establishments.

This unit is applicable to workers in registered wild game processing plants and is not relevant to field harvesters.

All work should be carried out to comply with workplace procedures, customer requirements and product specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

AMPX209 Sharpen knives

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Remove the internal organs and tissues left	1.1 Identify organs and tissues to be removed 1.2 Remove pluck without contaminating the carcase in accordance

Element	Performance criteria
in the wild game animal carcase	with work instructions 1.3 Present organs for inspection according to regulatory requirements 1.4 Identify and comply with workplace health and safety requirements 1.5 Identify sources of contamination and cross-contamination 1.6 Take corrective action in the event of contamination in line with work instructions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to MTMP3039C Eviscerate game shot carcase.

Assessment Requirements for AMPA3041 Eviscerate wild game animal carcase

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must eviscerate a carcase that has been wild game shot and forwarded to a meatworks for processing.

The candidate must:

- remove internal organs to workplace and regulatory requirements
- follow procedures for presenting offal for inspection
- meet workplace health and safety requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements applying to evisceration of wild game animal carcase
- purpose and method of presenting offal for inspection
- relevant work instructions
- organs to be removed
- potential risks of contamination and cross-contamination of the carcase and the required steps for corrective action

Assessment Conditions

Assessment must be conducted in a registered wild game processing establishment.

Competency must be demonstrated at the normal speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
