Assessment Requirements for AMPA3050 Bone large stock carcass - forequarter

Release: 2

Assessment Requirements for AMPA3050 Bone large stock carcass - forequarter

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 5.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

The candidate must remove primal cuts from the forequarter of large stock carcasses, such as beef, horse, buffalo

The candidate must:

- demonstrate the procedure for boning large stock carcass forequarter primal cuts in accordance with workplace requirements
- bone product in safe and hygienic manner
- identify primals containing contamination or abnormalities and handle according to workplace and regulatory requirements
- maintain the accuracy of cutting lines
- use equipment correctly
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) when reporting to supervisor or interacting with team members.
-

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- personal hygiene, dropped meat and workplace health and safety procedures
- primal cutting lines as they relate to the structure of the large stock carcass
- regulatory, workplace and meat safety procedures and specifications
- boning procedure for cuts that is required to maximise yield for a given carcass
- procedure for removal of all forequarter primals to desired specifications
- carcass defects and the corrective action to be taken.

Assessment Conditions

Assessment must be conducted in a registered, operating meat processing plant or premises.

Competency must be demonstrated at the normal rate of production for that plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
