Assessment Requirements for AMPA3081 Perform offal Meat Hygiene Assessment

Release: 2

Assessment Requirements for AMPA3081 Perform offal Meat Hygiene Assessment

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 5.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

The candidate must monitor hygiene assessment of offal.

The candidate must:

- monitor product for defects according to the MHA program
- record the monitoring results accurately
- calculate defect ratings
- instigate corrective actions when appropriate
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant regulatory requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- hygiene and sanitation requirements when monitoring product
- workplace health and safety requirements when monitoring product
- types of defects to be identified in carcase, offal and carton product
- when and how corrective actions are to be taken in response to monitoring outcomes
- how defect ratings are detected
- classification of defects
- purpose of an MHA program
- relevant regulatory requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

Competency must be demonstrated while actually complying with:

- Australian Government - Agriculture and/or state meat authority regulations
- company procedures.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessors must satisfy the current standards for RTOs.
