# AMPA406 Inspect transportation container or vehicle

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AMPv2.0    | Initial release |

## Application

This unit covers the skills and knowledge required to apply regulatory and workplace requirements for the inspection of meat transport containers and vehicles.

Inspection of containers and trucks prior to the transport of meat products is a mandatory requirement and is undertaken by meat safety and/or Quality Assurance (QA) officers.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who take responsibility for their own work and for the quality of others' work within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

## Pre-requisite Unit

Nil.

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

This unit is equivalent to MTMP408A Inspect transportation container/vehicle.

# Assessment Requirements for AMPA406 Inspect transportation container or vehicle

## Modification History

| Release | TP Version | Comment         |
|---------|------------|-----------------|
| 1       | AMPv2.0    | Initial release |

## Performance Evidence

The candidate must apply regulatory and workplace requirements for the inspection of meat transport containers and vehicles.

The candidate must:

- assess vehicle against workplace and regulatory standards and requirements
- identify non-conformance in hygiene and sanitation, workplace health and safety, and licensing requirements
- apply mathematical applications relevant to work instructions and Standard Operating Procedures (SOPs)
- follow enterprise and regulatory inspection procedures for meat transport vehicles
- prepare reports clearly and concisely in standard formats
- follow workplace health and safety requirements whilst conducting inspections
- take corrective action if vehicle or container does not meet workplace or regulatory requirements

## Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- potential sources of contamination
- regulatory and enterprise hygiene and sanitation requirements related to inspection of meat transport vehicles or containers
- licensing and registration requirements for meat transport vehicles

## Assessment Conditions

Assessment has to utilise actual containers or vehicles for inspection activities.

Candidates must be able to implement current regulatory requirements.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
