AMPA408 Inspect wild game meat

Release: 1

AMPA408 Inspect wild game meat

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to inspect wild, field-shot game meat during processing.

This unit is only applicable to those inspecting wild, field-shot game carcasses in a processing plant.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Describe wild game meat classification requirements	1.1 Identify animal habitat in accordance with workplace requirements 1.2 Identify and classify wild game meat in accordance with workplace and regulatory requirements
2. Identify distinguishing characteristics and features of game animals	2.1 Identify differences between game and non-game species 2.2 Identify structure, location and function of varying body systems 2.3 Identify organoleptic or sensory differences between game and non-game animals
3. Inspect wild game meat	3.1 Inspect wild game meat in accordance with regulatory, hygiene and sanitation, and workplace health and safety requirements

Element	Performance criteria
	3.2 Detect and identify abnormalities in wild game meat 3.3 Identify major diseases and defects of game 3.4 Inspect carcase parts and organs in accordance with workplace and regulatory requirements 3.5 Make dispositions according to regulatory and workplace requirements 3.6 Complete reporting and recording requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AMPA408 Inspect wild game meat

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Evidence must demonstrate the candidate's consistency of performance over time at production speed.

The candidate must inspect wild game meat.

The candidate must:

- list the main wild game meat animals
- list and describe major diseases and defects of game
- identify and apply relevant workplace health and safety requirements
- inspect wild game meat in accordance with workplace and regulatory requirements
- identify abnormalities or diseases in wild game meat
- access and explain regulatory requirements for wild game meat inspection
- complete mathematical operations required to calculate or establish regulatory compliance
- identify useful learning resources when working with unfamiliar species
- identify sources of contamination and take corrective action
- take action to improve work performance as a result of self-evaluation, feedback from others, or changed work practices or technology
- use relevant communication skills
- work with processing team to ensure carcasses are presented correctly and in a timely manner

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- requirements for classifying animals or carcasses as wild game
- basic structure of game animals
- regulatory requirements for handling wild game meat
- distinguishing characteristics and features between the game and non-game animal

Assessment Conditions

Competency need only be demonstrated on the inspection of one game species.

Assessment must include utilising wild game field shot carcasses.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.
