Assessment Requirements for AMPG304 Receive and inspect wild game carcasses at a processing plant

Release: 1

Assessment Requirements for AMPG304 Receive and inspect wild game carcasses at a processing plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must make a disposition on wild game animal carcasses as they are received at a game processing plant.

The candidate must:

- demonstrate competent pre-dressing inspection of carcasses following presentation without guidance or supervision
- recognise diseases and abnormal conditions and make dispositions
- assess harvester tags for completeness, eligibility and accuracy
- assess temperature of carcasses (where required)
- identify:
 - faecal material
 - ingesta
 - enlarged or discoloured kidneys
 - indication of any decomposition process
 - emaciated carcasses
 - abnormal animals
 - fly strike
 - mould
 - unacceptable contamination by other foreign matter
 - faulty dressing
 - evidence of animal welfare issues
- determine which carcase needs to be retained
- communicate and record inspection results
- ensure requirements of the work instruction have been addressed
- read and interpret workplace related documentation
- apply numeracy skills relevant to work instructions
- share information
- show independence during inspection
- work without supervision

- where necessary delegate
- collect, analyse and organise information
- take initiative and make decisions within workplace role
- use technology and workplace-related equipment

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- relevant sections of AS 4464:2007 Hygienic Production of Wild Game Meat for Human Consumption
- importance of the process and the need to control the unloading process to ensure adequate inspection
- relevant work instruction and Standard Operating Procedures (SOPs)
- state wildlife/conservation authority requirements
- company Food Safety Approved Program requirements
- workplace health and safety hazards associated with unloading
- lighting requirements
- temperature requirements
- sampling and temperature check procedures and reporting requirements
- micro testing arrangements
- rejection and disposal processes
- carcase retain procedures
- calibration requirements
- processes for scales preparation and carcase weighing
- weight requirements and underweight reporting procedures
- company and regulatory reporting requirements
- approved tag requirements
- inspection records requirements
- evidence of diseases and conditions
- causes of contamination
- anatomy of game animals sufficient to provide meaningful and objective feedback to harvesters and depot managers
- identification and traceability regulations/requirements
- nature of data logger information

Assessment Conditions

This competency has to be demonstrated under actual work conditions at a wild game processing premises receiving wild game animal carcasses either from field depots or direct from the field.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
