Assessment Requirements for AMPG305 Store wild game carcasses

Release: 1

Assessment Requirements for AMPG305 Store wild game carcasses

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must move carcasses safely and hygienically into and out of wild game carcasses depots.

The candidate must:

- move and store wild game animal carcass according to workplace, health and safety, hygiene and sanitation, Quality Assurance (QA) and regulatory requirements
- perform basic refrigeration maintenance
- measure and record temperature if part of workplace requirements
- explain workplace requirements related to storing carcass product

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- handling procedures for carcass product
- hygiene and sanitation requirements related to storing carcass product
- methods of product transfer
- workplace health and safety requirements to reduce potential risks
- potential workplace health and safety risks related to storing carcass product, transferring carcasses on a rail, and working in a cold environment
- regulatory requirements related to storing carcass product
- importance of storing product at the required ambient temperature

Assessment Conditions

Assessment must be conducted in an accredited field depot environment.

Competency must be demonstrated under normal operating conditions.

As a minimum the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration (face to face or video)

- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
