AMPG307 Inspect wild game field depot

Release: 1

AMPG307 Inspect wild game field depot

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to inspect a wild game field depot.

The unit applies to individuals working in a wild game meat business who are required to conduct and report on inspections of wild game field depots.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for inspection	1.1 Negotiate and confirm inspection time with field depot operator 1.2 Confirm scope of inspection, including compliance with relevant standards and legislation 1.3 Access workplace documents or templates required for inspection and verify documentation to be used meets requirements for inspection

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Prepare documentation according to inspection requirements
2. Inspect wild game field depot food safety program	2.1 Verify field depot has documented food safety program on site 2.2 Review food safety program for accuracy and compliance with standards and legislation 2.3 Question field depot operator to verify their understanding of the program
3. Inspect site and equipment	3.1 Conduct visual assessment of field depot to verify it is clean and sanitised, seals are intact, the depot is free of rust or flaking paint, and that lighting meets industry standards 3.2 Confirm facilities enable hygiene and sanitation, including adequate supply of potable water, hand wash facilities and facilities for cleaning and sanitising equipment 3.3 Confirm that regular hygiene checks have been conducted and recorded 3.4 Check that equipment and machinery is in good working order 3.5 Check equipment maintenance is conducted regularly, and maintenance records are compliant and accurate 3.6 Verify temperature is monitored and recorded accurately, and monitoring instruments have been calibrated
4. Inspect wild game animal carcase process and storage	4.1 Check wild game animal carcasses are tagged and recorded according to regulatory requirements 4.2 Verify carcasses have been delivered to field depot within time requirements 4.3 Confirm carcasses are hung and spaced according to regulatory requirements 4.4 Check carcasses have been killed and bled according to regulatory requirements 4.5 Confirm no gut or faecal contamination is present 4.6 Check the bladder has been removed and pluck is intact and attached 4.7 Verify muscle temperature has been checked and recorded according to regulatory requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Check field depot operator	5.1 Confirm field depot operator holds required qualifications, licenses and accreditation 5.2 Check that field depot operator follows hygiene and sanitation requirements when processing wild game
6. Prepare inspection report	6.1 Complete inspection checklists according to workplace and regulatory requirements 6.2 Discuss initial inspection findings with field depot operator, and issue any non-compliance notices if required 6.3 Prepare inspection report and present recommendations and opportunities for improvement to appropriate personnel 6.4 Store inspection report using workplace processes and systems

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Interpret key requirements of standards and legislation that relate to the harvesting and processing of wild game meat
Oral communication	Speak clearly and firmly in a polite and assertive manner to address differences of opinion objectively during the inspection
Numeracy	Interpret temperature data and calibration records to confirm product is chilled according to regulatory requirements

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
AMPG307 Inspect wild game field depot	Not applicable	Unit has been created to address an emerging skill required by industry	Newly created

Assessment Requirements for AMPG307 Inspect wild game field depot

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted two separate inspections on a wild game field depot on at least two occasions, including:

- checked that the field depot meets industry requirements for hygiene and sanitation
- documented inspection findings using workplace documents and forms
- communicated inspection findings with field depot operator.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hygiene and sanitation processes for processing wild game carcasses
- workplace health and safety associated with wild game processing
- sections of the Australian Standard for the Hygienic Production of Wild Game Meat for Human Consumption relevant to wild game field depot inspections
- Department of Agriculture Meat Notice Number 2009/18, Additional Requirements for Wild Game Processing for Export
- sections of the Food Regulation 2015 relevant to wild game field depot inspections
- state and territory legislation relevant to wild game field depot inspections
- workplace/organisational document storage systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an operating game field depot or an environment that accurately represents workplace conditions

- specifications:
 - use of specific workplace documents such as a documented food safety program
 - access to standards and legislation relevant to wild game field depot inspections
- relationships:
 - operators of wild game meat field depots.

A minimum of three different forms of assessment must be used.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
