Assessment Requirements for AMPMGT511 Manage feedlot facility

Release: 1

Assessment Requirements for AMPMGT511 Manage feedlot facility

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken the following feedlot facility management functions:

- documented a 12 month feedlot operational plan
- conducted one audit of record keeping to comply with legislative requirements
- completed an assessment of all sections of a feedlot facility and confirmed plant, equipment and structures are clean, secure and well maintained on one occasion
- developed one operational and monitoring regime to optimise animal health and welfare and to ensure nutrition and traceability requirements are met
- directed the purchase and logistics of a cattle ration on one occasion
- arranged the induction and training of staff on one occasion
- identified and met the service needs of a meat processor on one occasion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles, practices and factors relating to managing a feedlot facility, including:
 - health and safety considerations, including manual handling
 - relevant animal welfare and biosecurity requirements
 - National Livestock Identification System
 - feedlot design, construction and waste management
 - animal health and welfare requirements
 - stock feeding regimes
 - relationship between feed consumption and liveweight gain
 - strategies to optimise liveweight gain and maximise feed conversion efficiency

- common pests and diseases, and preventative and management strategies
- impact of climatic factors such as excessive heat load during summer months
- methods of calculating heat load index
- treatments for minor stock injuries
- strategies for training and managing staff
- strategies for managing and developing personnel and stakeholder relationships, including establishing targets, developing capability and managing conflict.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an operating, National Feedlot Accreditation Scheme (NFAS) accredited feedlot
- specifications:
 - workplace policies and procedures, legislation and codes of practice relevant to managing a feedlot facility
- relationships:
 - feedlot staff
 - supplier.

A minimum of three different forms of assessment must be used.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
