Assessment Requirements for AMPMGT513 Manage transportation of meat, meat products and meat by-products

Release: 1

Assessment Requirements for AMPMGT513 Manage transportation of meat, meat products and meat by-products

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion managed the transportation of meat products for a customer, including:

- identified and planned the customer's logistical requirements according to regulatory and enterprise requirements and resources allocated
- conducted an effective consultation with the customer to meet transportation requirements
- developed supplier quality criteria, including audit requirements, for purchasing transport services
- established systems for completing and certifying documentation of product transportation
- identified and analysed transportation options
- developed and communicated procedures to personnel, customers and contractors of changes in schedules
- identified and applied relevant workplace health and safety requirements
- presented a report for the meat transportation according to legal and enterprise requirements
- used a communication and information technology system to monitor the transportation purchase, schedule and track consignment, and collect and analyse performance information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- food safety requirements for meat and meat product transportation
- regulatory and workplace requirements relating to the transportation of meat, meat products and meat by-products
- potential impact and costs of inappropriate transportation of meat, meat products and meat by-products, including public liability and loss of custom

- public and workplace health and safety obligations relating to the transportation of meat, meat products and meat by-products
- requirements for maintaining product quality during transportation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a meat industry workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to appropriate technology for research and data collection, analysis and reporting
- specifications:
 - access to workplace documents such as policies, procedures, processes, forms
 - access to specific legislation/codes of practice relevant to enterprise operations
- relationships:
 - customer
 - personnel
 - contractor.

A minimum of three different forms of assessment must be used.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
