AMPOPR303 Manage animal identification data

Release: 1

AMPOPR303 Manage animal identification data

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 8.0.

Application

This unit describes the skills and knowledge required to receive livestock into lairage at a meat processing premises, using livestock identification data systems, such as the National Livestock Identification System (NLIS) or PigPass.

This unit applies to individuals who work as quality assurance managers, livestock clerks or lairage supervisors, who take responsibility for managing animal identification data for livestock from the point of arrival at an abattoir or export shed.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive livestock	1.1 Identify workplace health and safety hazards, assess risks and implement control measures 1.2 Receive animal and accompanying movement documentation and check for completeness

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Carry out physical check of received stock (head count) against the movement documents 1.4 Check documentation for any status alerts, and implement workplace procedures where required
2. Check animal identification and origin	2.1 Check animal for presence of identification tags or devices 2.2 Implement workplace procedure for non-identified stock 2.3 Record or scan animal identification for compliance with state regulations 2.4 Implement corrective action for any status alerts for Property Identification Code (PIC) or animal device
3. Report on animal identification data	3.1 Upload or provide data to complete animal identification records and reports according to workplace requirements 3.2 Complete records of issues arising and actions taken 3.3 Report issues with animal identification for livestock received at site to supervisor or manager

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	- Interpret procedures to operate animal identification system - Interpret information included on National Vendor Declarations (NVDs), electronic NVDs (ENVDs), PICs
Writing	Keep paper-based and/or digital records associated with livestock identification system
Oral communication	Follow up and resolve issues with original location or issues that arise with PICs, NVDs and ENVDs

Assessment Requirements for AMPOPR303 Manage animal identification data

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed animal identification data and systems to receive and process at least one lot of livestock in a meat processing premises, including:

- checked animal identification devices, Property Identification Codes (PICs), National Vendor Declarations (NVDs), electronic NVDs (ENVDs)
- identified status alerts and taken corrective actions
- downloaded or compiled reports utilising animal identification data.

The individual must manage National Livestock Identification System (NLIS) data for stock identified with Radio Frequency Identification Devices (RFIDs) from the point of arrival at an abattoir and whilst they are in lairage.

The individual must have:

- received stock
- used mathematical skills to verify stock arriving against number listed on NVD/Post Sale Summary (PSS)
- checked NLIS devices
- communicated issues/matters arising to internal management
- read and interpreted a pre-sale catalogue or vendor declaration
- read and interpreted an NVD and PSS
- used communication skills relevant to work instructions and standard operating procedures (SOPs) to interact with agents or transporters, and raise and explain issues and problems
- used negotiation skills to resolve issues such as problems with original location, incomplete NVDs or PICs
- taken appropriate steps to minimise workplace health and safety risks when working with livestock.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the animal identification system in use at site, including the origin and nature of the system, its commercial importance, its role in food safety and importing country requirements, and its role in traceability
- national and state regulatory requirements for animal tags for animal species received at worksite
- movement documents, including NVD, PSS, waybill, and documents used in state jurisdictions such as Transported Stock Statement (TSS), a buyer's reconciliation provided by the saleyard, or a permit issued by an authorised officer
- database operations and how to download reports for various outputs
- where to go for assistance with database issues
- the animal identification system tagging, which may include RFIDs and boluses for NLIS system, or tags and tattoos for pigs
- purpose, nature of and regulations underpinning the use of PICs
- purpose of NVDs and ENVDs and the information included
- purpose, nature of and regulations underpinning the use of PICs
- animal identification system devices, including scanners
- PIC status codes, abbreviations and what they mean, and the required actions to be taken in response
- issues that can arise with original location, incomplete NVDs or PICs, and associated corrective actions
- the role of pre-sale catalogues and PSSs from saleyards
- the role of animal identification on kill sheets.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a meat processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - animal identification system (NLIS or PigPass) and associated devices
 - tagged livestock
 - relevant movement documents
- specifications:
 - standard operating procedures associated with animal identification system.

Assessment for this unit must include at least three forms of evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
