Assessment Requirements for AMPP301 Operate a poultry carcass delivery system

Release: 1

Assessment Requirements for AMPP301 Operate a poultry carcase delivery system

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated all steps to operate a carcase delivery system at least once, including:

- selecting and loading correct computer program
- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on system
- setting computer settings to meet production requirements
- starting, operating, monitoring and adjusting equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- conducting production handover
- safely shutting down equipment
- applying food safety procedures to work practices
- contributing to workplace improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- carcase delivery system configuration, including system flow, layout and drop points
- customer ordering procedures, including common terms used to describe product and order requirements, and criteria to apply to prioritise customer orders
- basic operating principles of equipment and programs used to:
 - deliver the required birds to the correct locations within constraints of birds available
 - generate system reports

- limits and ranges of system to adjust for weight distribution
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- main alarms and corrective action required if alarms are activated
- systems and responsibilities for communicating required information to others
- hazards, risks and controls associated with a poultry carcase delivery system
- methods for monitoring work health and safety, food safety, quality and environmental hazards and risks
- workplace procedures for identifying and communicating system improvements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - system equipment and related accessories and services
 - birds for processing
 - packing area
 - workplace information recording system
- specifications:
 - information on equipment capacity and operating parameters
 - kill schedules, customer orders and related advice on system requirements
 - communication and recording procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
