Assessment Requirements for AMPQUA410 Manage the collection, monitoring and interpretation of animal health data

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Processing Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed the collection, monitoring and reporting of animal health data from a meat processing premises on at least one occasion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the common diseases and conditions that are to be recorded relevant to the species and premises
- the signs of the relevant endemic diseases and conditions to be recorded at ante- and post-mortem
- the costs associated with common endemic animal diseases and conditions (to be recorded) for processors and producers through condemnns and partial condemnns
- the source for advice on the ways the incidence of these diseases and conditions can be reduced
- the ante- and post-mortem data collection and recording procedures for the premises
- the procedures for verification of the accuracy of the data collected
- the fields in the database
- how data are uploaded to a database
- the nature of abnormalities in data that require investigation to establish the cause and potential impact on producers and processors
- how to format animal health data reports to address the needs of the range of parties receiving the data
- how to ensure control of privacy relating to data collected for individual animal owners.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a meat processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - animal health data
 - working database and record-keeping system
- specifications:
 - use of specific workplace documents such as policies, procedures, processes and forms
 - access to specific legislation/codes of practice
- relationships:
 - clients and stakeholders
 - team members.

Assessment for this unit must include at least three forms of evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
