Assessment Requirements for AMPS205

Select, identify and prepare casings

Release: 1

Assessment Requirements for AMPS205 Select, identify and prepare casings

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must select, identify and prepare casings.

The candidate must:

- identify casing size requirements according to product specifications
- identify casing size requirements for specific products in regard to length, weight and diameter
- prepare casings to product specifications and workplace procedures
- identify, remove and report defective product according to workplace procedures
- apply relevant communication and mathematics skills
- follow the requirements of the work instruction
- work to production speed

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- storage requirements of soaked casings carried over from production
- storage requirements of both natural and synthetic casings
- filling yield of various sizes and types of casings
- purpose of each phase of casing preparation
- possible faults in skins and their effect on the product
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
