Assessment Requirements for AMPS209 Rotate meat product

Release: 1

Assessment Requirements for AMPS209 Rotate meat product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must rotate meat products in a meat establishment.

The candidate must:

- follow the work instruction
- work at production speed
- read and interpret product labels
- store meat product in accordance with temperature requirements
- demonstrate rotation of stored meat product in line with:
 - hygiene and sanitation requirements
 - workplace health and safety requirements
 - regulatory requirements
 - workplace requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- select, organise, report and record routine information and mathematical data related to:
 - labelling
 - rotation and shelf life of meat product
 - storage of meat product

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- stock rotation requirements for meat products to regulatory and hygiene requirements
- effects on the product of the use of meat product which is beyond its useful life
- storage temperatures and shelf life for meat products

Assessment Conditions

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
