Assessment Requirements for AMPS304 Thaw product - water

Release: 1

Assessment Requirements for AMPS304 Thaw product - water

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently carry out the thawing process according to workplace and regulatory requirements.

Candidates must:

- follow the requirements of the work instruction
- work to production speed
- check and prepare tanks for thawing
- identify contaminated product prior to thawing and take corrective action according to workplace requirements
- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and dispatch to further processing
- follow workplace health and safety and hygiene requirements
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with thawing of product
- workplace requirements for thawing product including:
 - workplace health and safety requirements.
 - Standard Operating Procedures (SOPs)
- principles of stock rotation

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
